**FORGERIES OF GERMAN WWII
OCCUPATION STAMPS: ZANTE,
INSELPOST (LEROS, VUKOVAR,
RHODOS) AND
GENERALGOUVERNEMENT (LOCAL
WARSAWA, RUDNIK NAD SADEM,
KOSCYSE).**

2014

The stamps presented here are “almost perfect” (they are never perfect) forgeries. They have the overprint and (if there is) a back forged signature. The first fact allowing the collector to detect them is that the back signature was made with a rubber stamp instead of a hardened steel one (or a metallic one in general). Probably, the ink used for the overprint has an “after 1945” chemical composition. The only thing we may suggest to collectors is to submit the stamps they have to an expert (BBP experts are nice) and/or to command a non invasive spectroscopic analysis of the overprint. Happily each stamp presented here has its own distinctive structure (overprint final design, color, perforations, etc.). It will be easy for anyone to know if his collection is infected with any of the forgeries presented here.
